

- MICROSOFT AZURE CASE STUDY -

THE CLIENT

- INDUSTRY:** Finance
- LOCATIONS:** Dubai, UAE
- TECH:** Microsoft Azure VM Infrastructure
- WEBSITE:** anantaraaccounting.com
- SUMMARY:** ERP management accounting Software

THE SITUATION

- Anantara needed to move into a cloud environment and make its software available to customers.
- The software was only available on-premises and needed one implementation per customer.
- Anantara Accounting needed a modern cloud-based system in a secure environment to enable multi-tenant access and central management.

THE CLIENTS WORDS

LA NET explained and guided us on how to use the cloud-based technology in Microsoft Azure with clear communication.

They worked with us to ensure our customers' security questions and concerns were met. We were up and running smoothly and securely from the very first day.

I highly recommend the team at LA NET!

Ajay Lala
Director at Anantara Accounting

HOW DID WE HELP?

Anantara Accounting had a single server solution for each customer and needed a way for multiple customers to access the solution securely and efficiently.

LA NET assisted with setting up a best practice Azure landing zone environment and server infrastructure. This included ensuring the required security, monitoring and governance are in place.

- We helped Anantara to migrate their software into Microsoft's Cloud Platform, leveraging the latest and best features of Microsoft Azure
- We worked closely with Anantara to ensure the security and governance required were in place and that customer security concerns and requirements were met
- We gave access to our Helpdesk, which responds to all requests within 60 minutes (or less).
